

Ngoc Hung Nguyen

Lund University, 22100 Lund, Sweden | nnhungbk@gmail.com | +46-072-0433198
 [ngoc-hung-nguyen](#) |  [jos-hung](#) |  <https://jos-hung.github.io/nnhung/>

RESEARCH INTEREST

Computing: Cloud/edge computing, IoT, deadline-aware task scheduling
Intelligence: Applied AI/ML for networking (deep learning, deep reinforcement/reinforcement learning)
Algorithms: Greedy, graph-based algorithms, evolutionary computing.

EDUCATION

- Lund University** Period: 2025 - 2029
Toward Ph.D at the department of Electrical and Information Technology
Topic: Algorithms for XR in 6G networks
Supervisor: Professor Bjorn Landfeldt, Ph.D
Lund, Sweden
- Hanyang University** 09-2021 - 02-2024
M.Sc. in Electrical and Electronic Engineering
Thesis: Offloading under Hard Deadline in Mobile Edge Computing
Supervisor: Professor Sang-Woon Jeon, Ph.D
Ansan, Korea
- Hanoi University of Science and Technology** 09-2013 - 08-2018
Engineer degree of Chemical engineering
Thesis: Applied Numerical Methods in Chemical Engineering
Supervisor: Professor Nguyen Dang Binh Thanh, Ph.D and Professor Bui Minh Dinh, Ph.D
Hanoi, Vietnam

WORK AND ACADEMIC EXPERIENCE

- Phenikaa University**  2025–Present
Researcher and Lecturer (currently on temporary leave)
Hanoi, Vietnam
 - Teaching: Cloud Computing, Computer Architecture, and Data Processing with Python.
 - Conducting research with students in the ICNL Lab.
- VinUniversity**  03-2024 - Present
Research Assistant
Hanoi, Vietnam
 - Research on Intelligent Transportation Systems using metaheuristics and Deep Reinforcement Learning techniques.
 - Exploring the application of AI and IoT in aquaculture.
- FPT Software**  01-2024 - 12-2024
Senior AI Engineer
Hanoi, Vietnam
 - Applied quantization methods to classification and detection models, including Resnet, SSD-Resnet, and DERT.
 - Developed quantized pipelines incorporating QAT, PTQ, and TVM_CPU frameworks.
 - Conducted testing and performance analysis of AI models.
- Hanyang University**  09-2021 - 02-2024
Research Assistant
Ansan, Korea
 - Research focused on Wireless Communication and Mobile Edge Computing.
 - Applied Deep Learning and Reinforcement Learning techniques to solve optimization problems.
 - Developed solutions using greedy algorithms for optimization.
- LG Electronics**  10-2018 - 07-2021
Senior Embedded Engineer
Hanoi, Vietnam
 - Developed Wi-Fi middleware as part of the Wi-Fi core framework.
 - Created SPI middleware for the SPI-Fi core framework.
 - Performed unit testing using Google Test framework.
 - Developed a tool for generating unit test code (C/C++ using Qt Creator on Windows OS).
 - Researched methods for evaluating camera sharpness based on different regions, leading to the development of test software for camera performance.
 - Worked on autofocus and low contrast brightness improvement features.
 - Developed various software tools for testing and performance analysis.

HONORS AND AWARDS

- Third-award - Student Research Prize** Hanoi
Hanoi University of Science and Technology 2017-2018

SKILLS

- **Programming Languages:** Python, C++/C, Cuda-C++, MATLAB
- **Data Science & Machine Learning:** Pytorch, TensorFlow, Pandas, Numpy
- **Technique:** Mathematical Modeling, Numerical Methods, Optimization, Applied AI/ML (e.g., RL/DRL)
- **Languages:** Vietnamese (mother tongue), English (fluent)

ACADEMIC SERVICES

- **Journal reviewer:** IEEE Internet of Things, IEEE Communications Letters, IEEE Transactions on Intelligent Transportation Systems, and Computer Communications

PATENTS AND PUBLICATIONS

C=CONFERENCE, J=JOURNAL, P=PATENT, S=IN SUBMISSION, T=THESIS
